# FELIS BRITANNICA PEDIGREE IMPORT APPLICATION

## 1 Registering Club

You must belong to one of the Felis Britannica member clubs in order to use Felis Britannica's registration services and through which to process your registrations – all registration applications must be sent to that club. Enter the membership number you hold with the club to process your registrations.

## 2 Cattery Name

The cattery name used must be that of the owner of the dam at the time of mating. The cattery name can **ONLY** be used for litters conceived after the cattery name has been granted. If you do not have a FIFe registered cattery name, a Felis Britannica admin prefix will be used, for a maximum of 2 litters. A jointly owned cattery name may only be used when the dam is also jointly owned.

## 3 Certificate of Entirety

A Certificate of Entirety is required for all un-neutered males over 10 months of age before Mating.

## 4 Certificate of Hearing

A Certificate of Hearing is required for all solid white cats and kittens before they can be shown, or their offspring registered.

## 5 Certified Pedigree

An original minimum 3 generation pedigree is required when importing a cat or kitten from any other registry into Felis Britannica. If a 3-generation pedigree is supplied, and the 4<sup>th</sup> generation information is not already available the imported cat will be registered on the RIEX register.

## 6 Import and Export

If you are importing a cat into Felis Britannica from any other registry you must provide proof of ownership. This could be a transfer certificate issued by the original registering authority, or a copy of the sales contract between the seller and the buyer.

## 7 Microchip Numbers

All Felis Britannica breeding cats must be micro-chipped. Where a microchip number is to be registered on the FB data base, an official document showing the Registered name of cat & the microchip number must be provided. (i.e., original chip cert, CoE for males, Pets Passport, vaccination certificate), for imports the number may already be included on the pedigree, or transfer document.

## 8 Registration Fees

Effective from 1<sup>st</sup> June 2017, all imports will be issued with a Felis Britannica pedigree.

## 9 Breeder As shown on the Official Certified Pedigree.

## 10 Name of Cat or Kitten

The original name of the cat or kitten must be retained.

## 11 Breed, Colour and Pattern

For cats being imported from another registry, these are the details as given on the original registration. In addition, if not already shown, the code for eye colour must be used if the cat is white, and for cats with 01,02 amounts of white.

The code for eye colour must be used for EXO/PER and BLH/BSH if the cat is silver tabby and its variety is not limited to one eye colour.

BML, EMS code is only to be used for an agouti silver or golden short haired shaded or tipped cat.

Any Asian, in all varieties including the GCCF 'Burmilla' will be EMS coded ASH-non or ALH-non depending on whether the Asian is short or long haired.

## 12 Endorsed

Any cat being imported whose pedigree shows that it is **not for breeding** will be marked as "**RESTRICTED**, no progeny to be registered".

**Endorsements may only be lifted by the breeder.**

## 13 Genetic Tests

Genetic tests are required for certain breeds, please check the FIFe rules and ensure that the required tests have been carried out, and the results registered with FB.

See [fifeweb.org](http://fifeweb.org) – Rules – Breeding & Registration Rules – Pg 30/31.

Currently tests are required for PER/EXO (FB Rule), BUR, KOR and NFO,

BAL/SIA, OLH/OSH, PEB. MCO\* (Please see the FIFe B & RR relating to the exception permitted by the FIFe board to the MCO HD test.
